Long range profiling.
- > **4,000M DEPTH RATING**
Ideal for shallow and deep water.
- > **PITCH & ROLL***
Provides Pitch and Roll to 0.2° accuracy.
- > **SMALL FORM FACTOR**
Highly compact high resolution profiling sonar.
- > **NO SLIP RINGS**
No components to wear.
- > **IMAGING & PROFILING**
Imaging and Profiling modes of operation.

Impact Subsea are proud to present the high resolution profiling sonar - the ISP360.

Optionally available with integrated Pitch & Roll.

Utilising a broadband composite transducer coupled with IS³ Impact Subsea Signalling Scheme enables a significant increase in range resolution while maintaining excellent accuracy and range capability.

For applications where Sonar Profiling, Pitch & Roll are required; all can be provided from a single device.

The IS³ Impact Subsea Signalling Scheme also allows multiple profilers to run without the need to 'ping-sync', enabling an increase in profiling speed.

Provided in a highly robust Titanium housing. Alternative configurations are available upon request.

APPLICATIONS INCLUDE:

Pipeline Profiling | Trench Profiling | Positioning of a Vehicle in a Tank |
Internal Pipe and Tank Profiling | Asset Positioning | Bridge Foundation Survey |
